ABHISHEK KUMAR SINGH

SENIOR SOFTWARE DEVELOPER

A results-oriented professional with over 7.5 years of experience in mobile and web application planning, development, testing, delivery, and support. Proficient in requirement gathering, product designing, database architecture, coding, and testing methodologies. Skilled in both frontend and backend development, with recent focus on building scalable web applications using Vue.js (including Nuxt.js and Vuetify), React.js, and robust backend APIs in Laravel and Node.js. Demonstrates a strong understanding of secure software development, web/mobile platform security, and user data privacy. Experienced in aligning product vision with technical execution, and skilled in client communication, post-delivery support, and customization. Always eager to learn and adapt to new technologies.

SKILLS

Frontend: JavaScript, Vue.js, Nuxt.js, Vuetify, React.js

Backend: PHP (Laravel, Yii2), Node.js

Database: MySQL, MongoDB

Tools & DevOps: Git, Bitbucket, JIRA, Workbench, Confluence, Asana, Jenkins

EXPERIENCE

Sr. Software Developer　　　　　Codefire Technologies, Noida　　　　　May 2018 – Current

A leading provider of comprehensive end-to-end digital technology solutions, specializing in custom software and product development.

Roles and Responsibilities:

- Frontend Development: Built responsive, component-based UIs using Vue.js, Nuxt.js, and Vuetify. Developed dashboards, data tables, form flows, and modals using Vuetify's component library, with custom theming and layout optimization.

- Backend & APIs: Designed and maintained secure REST APIs using Laravel and Node.js for data-driven applications. Integrated 3rd-party APIs (e.g., payment gateways, CRMs).

- Web Plugin Development: Created and deployed over 10 custom web plugins to enhance CMS and eCommerce platforms.

- UI/UX Enhancements**:** Collaborated with designers and stakeholders to improve user flows and component usability across mobile and desktop breakpoints.

- Code Quality & Version Control: Maintained high-quality code standards using Git and Bitbucket. Participated in code reviews and CI/CD workflows.

- Team Collaboration**:** Worked closely with cross-functional teams (Web, Android, iOS) to ensure seamless integration and on-time delivery.

- Client Communication: Acted as primary technical liaison with clients for requirement gathering, technical consulting, and support.

Software Developer　　　　　Qualcentric Web Solutions, Noida　　　　　Feb 2017 – May 2018

A top-tier custom software development company providing complete end-to-end digital technology solutions.

- Backend Development**:** Developed RESTful APIs and backend logic for mobile and web applications using PHP (Laravel/Yii2) and Node.js.

- API Integration: Integrated APIs for payment gateways, user authentication, and external services.

- Database Management: Designed and optimized relational database structures in MySQL to support application features and improve performance.
- Codebase Management: Used Git for version control and managed collaborative codebases across multiple environments.
- Cross-Team Collaboration: Worked closely with Android and iOS developers to ensure seamless integration of mobile features with backend services.

EDUCATION

Bachelor of Technology in Computer Science   ITS Engineering College,Gr. Noida(2012 – 2016)
